---	--

### DIVIDING DOOR IN THE PRM LAVATORY

The fully open dividing door between the two center lavatories provides enough space for a PRM. The dividing door has an operator side with a door lock and a handle. The opposite side is called the non-operator side.

Typical Dividing Door in the PRM Lavatory (Operator Side)

The cabin crew has to prepare a PRM lavatory before a handicapped passenger can use it. For more information about the operation: *Refer to 03-80-40 PRM Lavatory Combining Two Units.*
